PROFESSIONAL SUMMARY

AI Engineer with hands-on experience in Machine Learning, Deep Learning, NLP, Computer Vision, and Generative AI. Proven track record building and deploying end-to-end ML pipelines and LLM-powered applications in production. Dual expertise in Data Analytics — EDA, KPI dashboards, ETL workflows, and business intelligence. Proficient in Python, PyTorch, LangChain, and cloud-native tools.

TECHNICAL SKILLS

Languages	Python, SQL
ML / DL	Machine Learning, Deep Learning, Scikit-learn, PyTorch, TensorFlow, Computer Vision, OpenCV, YOLOv8
NLP & Gen AI	NLP, LLMs, Generative AI, RAG, LangChain, Hugging Face, Prompt Engineering, FAISS, CrewAI
Data Analytics	EDA, Feature Engineering, KPI Dashboards, Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau
Web & Deploy	FastAPI, Streamlit, Django, Flask, Docker, Git, AWS, MySQL

EXPERIENCE

Data Analyst

eClerx · Hybrid

Apr 2025 – Present

- Analyzing large-scale datasets to surface actionable business insights for Uber's mobility and grocery verticals.
- Building and maintaining KPI dashboards and reporting pipelines to track operational metrics across ride-sharing and delivery segments.
- Conducting end-to-end EDA and feature analysis using Pandas, NumPy, Matplotlib, and Seaborn on high-volume transactional data.
- Automating data workflows with Python, reducing manual reporting turnaround and enabling faster decision-making.

AI/ML Engineer Intern

Senpai Host · Hybrid

May 2025 – Nov 2025

- Designed and deployed ML/DL models for Computer Vision and NLP tasks across the full pipeline from preprocessing to production (FastAPI).
- Implemented YOLOv8 object detection and DeepFace facial recognition for a real-time AI proctoring system, achieving 95%+ detection precision.
- Built an NLP-based behaviour analysis pipeline for automated anomaly flagging and maintained model performance in production.

AI/ML Intern

ThinkNEXT Technologies · Mohali

May 2024 – Jul 2024

- Performed EDA on sales datasets and built interactive KPI dashboards using Python, Pandas, and Seaborn.

PROJECTS

MyProctor.ai — AI Exam Proctoring System *Python · FastAPI · OpenCV · YOLOv8 · DeepFace · MySQL*

- Real-time AI proctoring platform with YOLOv8 achieving 95%+ precision in prohibited-item detection and automated DeepFace facial identity verification.

NeuraChat AI — Multi-Provider LLM Chatbot *Python · LangChain · Streamlit · OpenRouter · FAISS*

- Generative AI chatbot using RAG architecture routing prompts across 5+ LLM providers with FAISS vector search and persistent session memory.

Hellobooks — RAG-Based AI Accounting Assistant *Python · LangChain · Pinecone · LLaMA · Streamlit*

- Production RAG application enabling small business owners to query accounting documents in natural language via LLM + vector DB pipeline.

Diabetes Risk Prediction — ML Classification Model *Python · Scikit-learn · Pandas · GridSearchCV*

- Benchmarked Logistic Regression, Random Forest, and SVM; achieved 82% accuracy with hyperparameter-tuned Random Forest via GridSearchCV.

EDUCATION

B.Tech — Artificial Intelligence & Machine Learning

CGC Landran · IKG Punjab Technical University, Punjab

2022 – 2026

CERTIFICATIONS & ACHIEVEMENTS

Certifications: AWS Cloud Operations · Amazon Web Services (2024) · IBM Data Analysis · IBM (2026) · Python for Data Science · IIT Madras NPTEL (2024) , Data Mining for Decision making (2026) : NPTEL IIT mandi

Achievements: 2× First Place — Ideathon, CGC Landran · Grand Finalist — Smart India Hackathon (SIH)
